

ADVANTAGE INSULATED STEEL RAISED PANEL GARAGE DOOR

General's Advantage Door is a three layer product, made with a 1-3/8" thick polystyrene core sandwiched between two 26-gauge pre-finished steel skins. The steel is protected by a G60 galvanizing layer topped by a heavy duty two-coat baked-on polyester paint system. The rated R-value is 6.3 and the door is available in four colors: White, Almond, Brown, and Sandstone. This door is used by custom home builders and is a very popular replacement door.

YOUR DOOR CONFIGURATION:
Residential Steel : Advantage : 2-car : Plain

FEATURES:

- 1-3/8" thick polystyrene insulation bonded between two 26 Gauge steel skins separated by a thermal break, yielding an R-value of 6.6.
- Authentic wood-grain detail and a deep, well-defined raised panel design that is sized and spaced in a way that is proportional to the door size. Also available flush.
- Durable two-coat, baked-on polyester finish on top of G-60 hot-dipped galvanized steel, inside and out.
- Full selection of window options, including insulated glass, each frame and insert painted to match door and minimize fading.
- Double tongue-in groove design forms a very tight section joint.
- Limited Lifetime Warranty.

AVAILABLE COLORS:

Arctic White

Almond

Sandstone

Deep Brown
