Model 9400

Your home is truly a reflection of you. It only makes sense that your garage door should also convey your personal style and taste. Now, there's a Wayne-Dalton garage door that speaks eloquently of you.

Wayne-Dalton Model 9400 Doors are rugged, low-maintenance, insulated, sectional steel doors that are pre-finished in Eurowhite. Beautiful as is or ready to custom paint to match your home's trim.

Whichever model Wayne-Dalton Garage Door you choose, you'll get the latest technology and safety features along with curb appeal, comfort and value. The hinges and hardware are galvanized steel; the panels are made with corrosion-resistant materials for long lasting beauty.

PINCH-RESISTANT DOOR PANELS

Pinch-resistant door panels are designed so closing sections actually push fingers safely out of harm's way.

ENERGY EFFICIENCY (R-8)

Patented foamed-in place polyurethane insulation. Insulation helps block heat loss in winter and heat gain in summer. Bottom Seal blocks drafts and saves energy.

Insulation helps block heat loss in winter and heat gain in summer.

Bottom seal blocks drafts and helps save energy.

TORQUEMASTER™ COUNTERBALANCE

The Wayne-Dalton TorqueMaster® is the first counterbalance to seal springs safely within a steel tube. That helps prevent the accidental release of tension that could cause serious injury.

TRIM AND HARDWARE

Optional trim hardware for Model 9400 Doors recreates the look of genuine split, swing doors. Made from rust-resistant galvanized steel with black powder coating and pebble texture for the look of true hand-hammered hardware. Each kit includes four hinge straps and two pull handles.

Wayne-Dalton warrants your Model 9400 Door for as long as you own it against cracking or splitting due to rust-through and against degradation of the foam insulation. Your track and TorqueMaster™ counterbalance are warranted against defects in workmanship or materials.
